

Your partner for clean  
and moisture proof  
transport packaging.

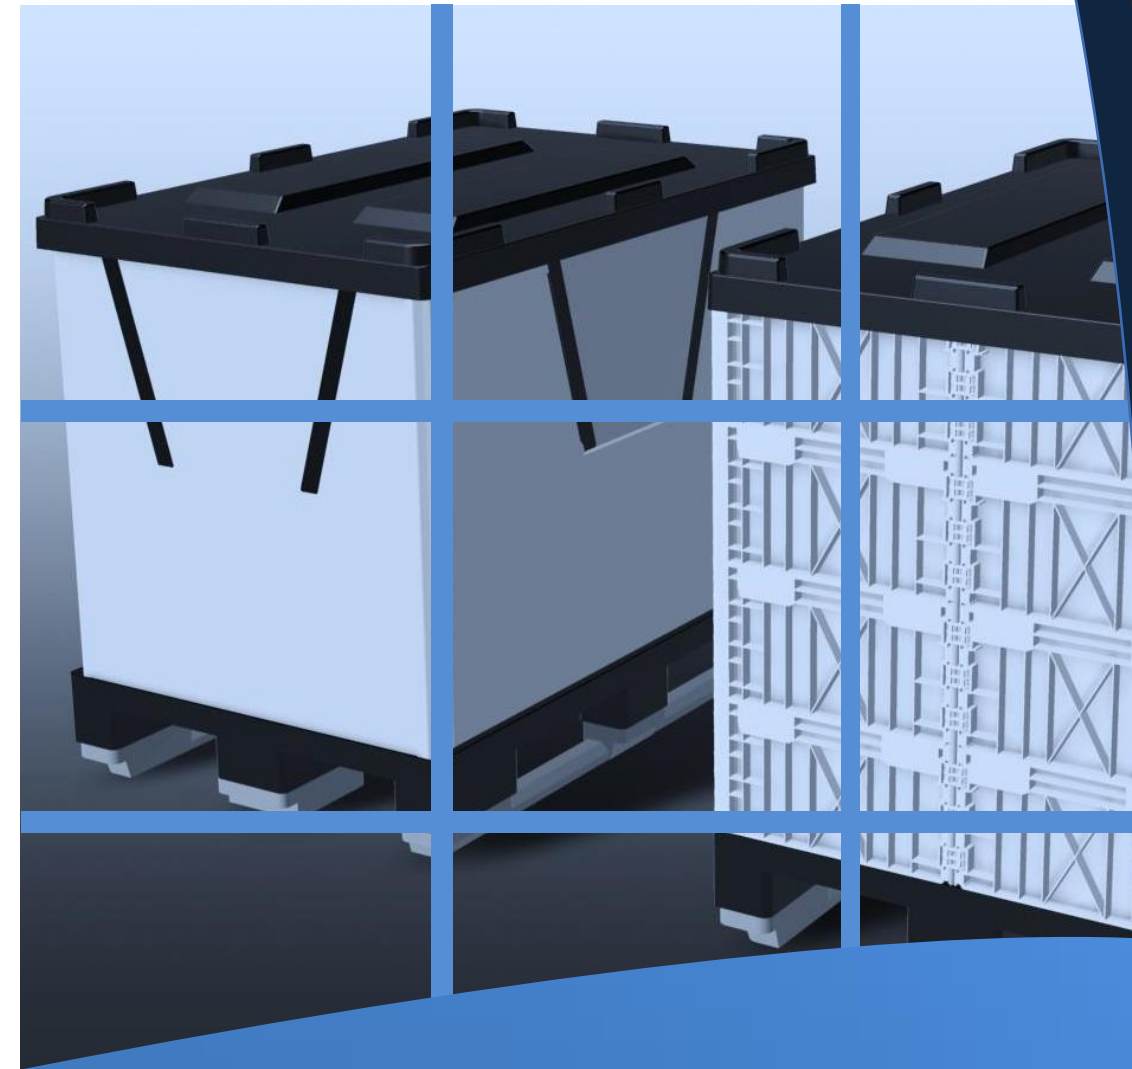

Innovation, reliability and flexibility are key words within the Wellplast AB organization. To maintain a long term relation to our customer our ambition is to exceed expectations both within service and product development. Wellplast AB is a full service packaging partner with in-house sheet production and converting. We ship to customers all over Europe

Wellplast AB specializes in transport packaging for all markets where hygiene or moisture is an issue. The unique materials together with our packaging experience create possibilities for unique and effective packaging solutions.

Do not hesitate to contact us. It will be well worth your time.

# Wellplast® PPC – Plastic Pallet System

## THE FUTURE OF PLASTIC PALLET RETURN SYSTEMS

The Wellplast® PPC plastic pallet system is developed for return systems with all parts in a robust design. It is unique in several ways. It is a flexible system with a robust pallet and lid that can be combined with pallet frames for heavy loads and with sleeves for lighter loads. The innovative design of the pallet frames substantially reduces time for frame handling and improves ergonomics for workers. The foldable sleeves are light weight and easy to handle. The v-shaped hatch makes it easy to reach down to the pallet.

The hatch has a unique locking system without unreliable moving parts. The pallet and lid can also be used for other type of goods, such as boxes of different kinds. The system is secured by using traditional strapping. Logistically the frames and sleeves are easily folded and secured and take up very little space

### ENVIRONMENT

The PPC system is durable and handles many return cycles. It is produced from Polypropylene that together with Polyethylene are the two plastic materials that has the least negative effects on the environment. All parts are 100% recyclable. Wellplast AB can recycle used pallet parts.

### PACKAGING RANGE

- PLASTIC PALLETS
- PALLET FRAMES
- PALLET SLEEVES
- PALLET LIDS
- INTERIOR FITMENTS
- INTERLAYERS
- DIVIDERS
- STRAPPING

## A new generation

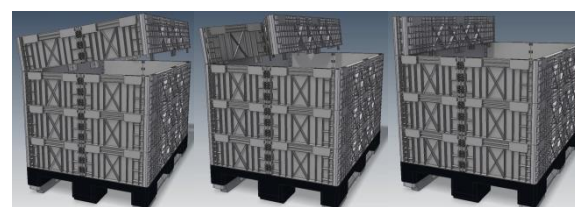

### PPC-F – PALLET WITH FRAMES

**Measurements:** 1200\*800mm (frame height 200mm)  
**Stacking load:** static 3000kg dynamic: 2000kg  
**Pallet racks:** Approved  
**Packing:** Frames flat packed  
**Material:** Copolymer polypropen  
**Securing/locking:** Straps

### PALLET FRAME

- High stacking strength
- Folds to fit on pallet
- Possible to fold away without removing

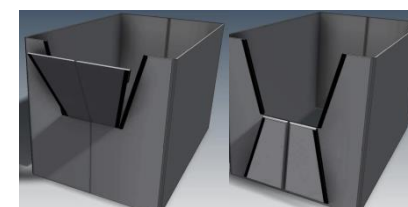

### PPC-S – PALLET WITH SLEEVE

**Measurements:** 1200\*800mm (sleeve high: 972mm low: 574mm)  
**Stacking load:** static 1400kg dynamic 700kg  
**Pallet racks:** Approved  
**Packing:** Sleeve flat packed  
**Material:** Copolymer polypropen  
**Securing/locking:** Straps

### SLEEVE HATCH

- V-shaped for easy reaching down.
- Simple locking system without moving parts
- Easy to handle hinge

### TESTS AND SAMPLES

The systems durability has been proved through intensive testin, in-house and with customers. Stacking strength has been tested in both laboratory environment and in real use. For new customers, samples are available for testing. We would also be happy to be present while testing.

### HYGIENE AND DUST

The PPC system is made from non-nonorganic materials that do not contain bacteria. The materials do not create dust. All parts are easily cleaned.
