

Durable material for many applications

Wellplast® R Recycled

Wellplast® R Recycled is a high quality corrugated plastic material for packaging such as interlayers, boxes, trays and interior fitments. It is produced in sheets by extrusion from 100% PP-plastic. In the production we use recycled material from our Buy-Back program as well as waste and trimmings from our production. Wellplast® R Recycled consists of up to 80% recycled material depending on the quality. Our goal is to increase the ratio to 100% and we constantly work at refining the process. The material is very light weight and very durable, why it is specifically suitable for return systems. Wellplast® R Recycled is produced in grey and black and is 100% recyclable.

Areas of use:

- ✓ Packaging
- ✓ Return packaging
- ✓ Outdoors packaging
- ✓ Clean packaging
- ✓ Signs
- ✓ Protective material
- ✓ Support material
- ✓ Insulating material

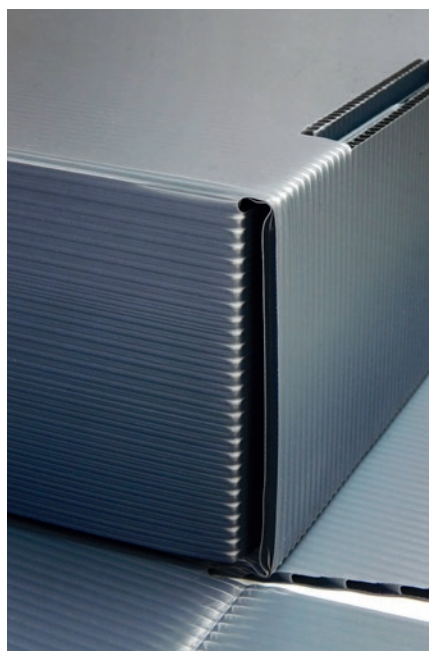

Specifications

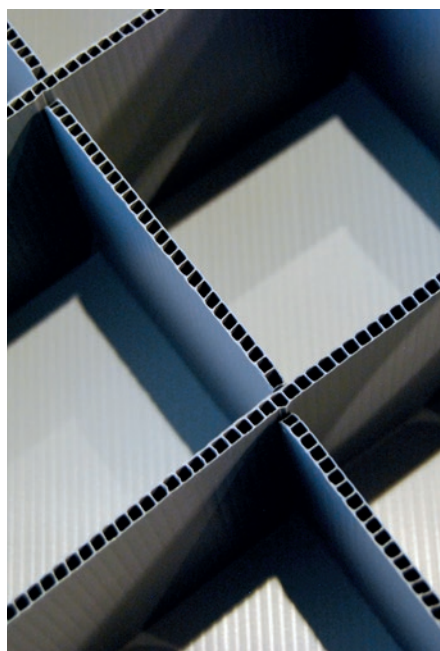

Wellplast® R (Recycled)	
Raw material:	Recycled Polypropylene
Size:	Maximum size : 6600*2500mm
Thickness:	2 mm – 10mm Standard 2, 3, 3.5, 4, 5, 8, 10mm
Weight:	250 g/m ² – 3000 g/m ²
Colour:	Grey or black
Printing:	Flexo, screen or UV/digital (Corona treatment as option)
Options:	UV-protection, anti-static, ESD, conductivity, flame retardant
Recycling:	100% recyclable (buy back program)
Waste sorting:	Sort as plastic
Other:	Can be delivered as rolls

Characteristics

Durable, clean, moisture proof, low weight, insulating, ECO-efficient.

Packaging

Recycled material
